

Electronic Case Management: Streamlining and Optimizing Care for Orphans and Vulnerable Children

Wednesday, October 14th

8-9:30 AM New York (GMT-4) | 2-3:30 PM Joburg (GMT+2) | 3-4:30 PM Nairobi (GMT+3)

Please join the OVC Task Force and interagency PEPFAR colleagues for a webinar discussion on how electronic case management systems (eCMS) can help OVC projects collect and manage data in ways that optimize the care provided to vulnerable children and their families.

The webinar will provide an overview of benefits and current use of electronic case management systems (eCMS) in OVC programs, and will introduce the forthcoming USAID-developed *OVC Case Management System Key Considerations*, a document created to support country teams as they are thinking about developing an electronic case management system to support OVC beneficiaries. It will also be an opportunity to hear country-level examples of how eCMS systems are being developed and applied, and lessons learned to inform the way forward.

Please mark your calendars and submit your questions for presenters in advance to: ovctaskforce@gmail.com

Please click the link to register for the Zoom webinar:
