
The PEPFAR Local Partner Transition: Reaching 70% by 2020

May 30, 2019

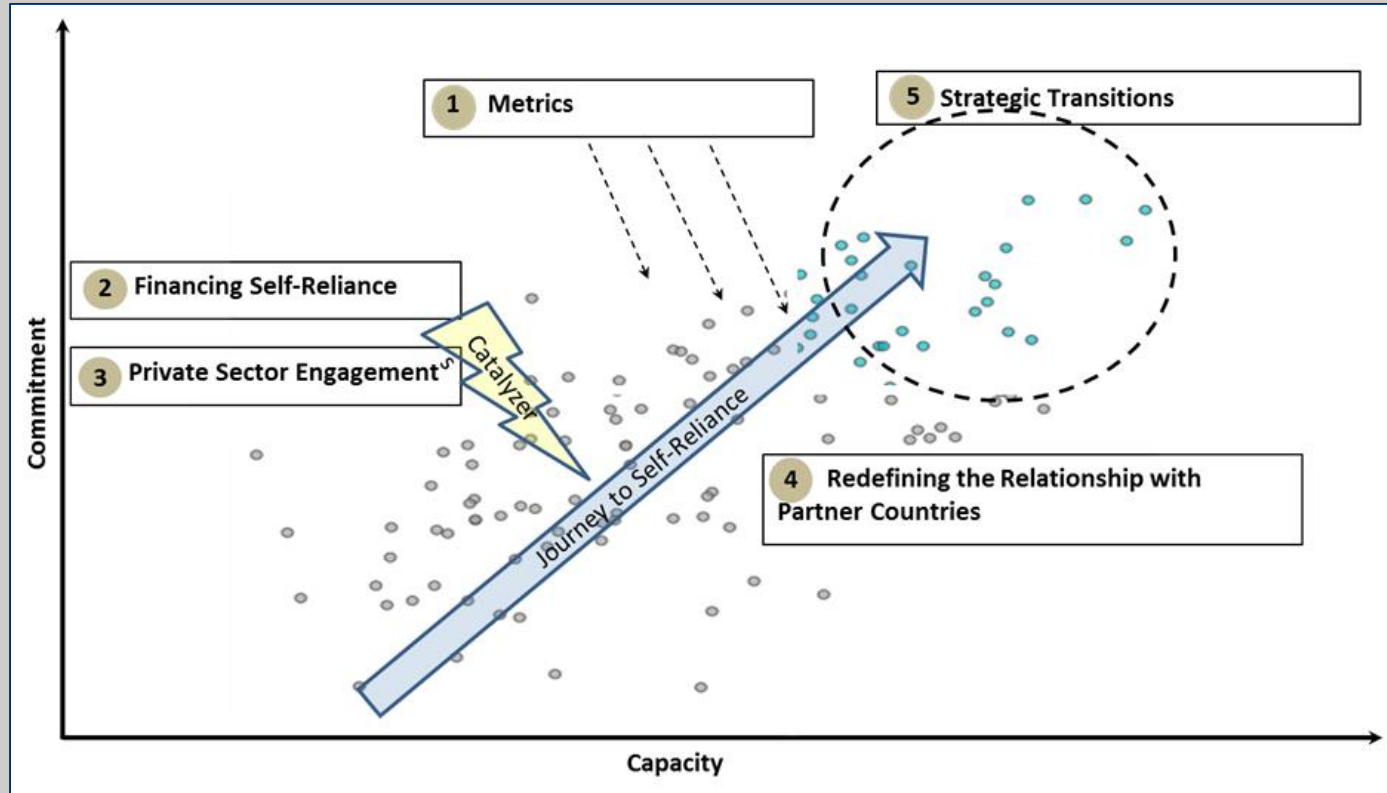

“To **sustain epidemic control**, it is critical that the full range of HIV prevention and treatment services are **owned and operated by local** institutions, governments, and organizations”

-COP19 Guidance for All PEPFAR Countries

“Move to local partners is critical and must be at **25%** by the end of FY18, **40%** at the end of FY19, and **70%** by the end of FY20”

-- Ambassador Birx Principal's Presentation
April 2018

PEPFAR's Local Partner Transition and the USAID Journey to Self Reliance

Where Are We Going?

Scale Up

- **International partners manage large awards** and maintain expertise to respond to PEPFAR requirements
- **Local organizations** handle smaller, limited scope sub awards

Transition

- **Local government, private sector, and civil society organizations** have capacity to increasingly acting as prime partners
- **Local partners** become increasingly able to manage **larger programs with consistent, high quality results and lower costs**
- **International partners maintain role** in capacity development and specialized technical skills

Sustained Epidemic Control

- **Countries manage and finance/co-finance the HIV/AIDS response** with reduced intl donor support
- **Local organizations** are the **primary implementers** of service delivery and can access **sustainable financing sources**
- **International partners** retain a critical yet **limited role in technical assistance**

Risks & Mitigation Strategies

RISKS

LPs failure to achieve PEPFAR service delivery targets

USAID failure to meet 70% funding target

MITIGATION STRATEGIES

Increase local capacity

Improve technical performance

Strengthen financial management

Change internal processes to make it easier to work with LPs

Increasing Local Capacity: Steps for Success
